Authorization for this examiner's amendment was given in a telephone interview with Robert Axenfeld on August 13, 2008.

The amendments are as follows:

- 1) In claim 7, delete "and other inner ear/cochlear excitability related diseases".
- 2) Delete claim 12.

Reasons for Allowance

The claimed invention of "a method of treatment of tinnitus...comprises administering to said subject a therapeutically effective amount of a compound of formula I" is novel and non-obvious. The closest prior art (Benes, EP 0751129A1) teaches said compounds are useful in treating epilepsy. The novelty in Applicant's method is that the compounds of formula I are administered as a method of treating tinnitus. At the time of the invention, the only pharmacological agent shown to be effective in treating tinnitus was lignocaine (Simpson, Trends in Pharmacological Sciences, 1999). As this is the closest prior art to the invention, the claimed invention is rendered neither anticipated nor obvious.
